# MT4 Chart Display and Functions Mac Version

We would like to introduce the chart display and functions.

If you cannot find the currency pair that you want in the quotes window, right click at the window, since it is possible to "display all the currency pairs", please try again.

In order to display the chart, Right click at the currency pair that you want to view. Click the "Chart Window" from the menu that was opened.
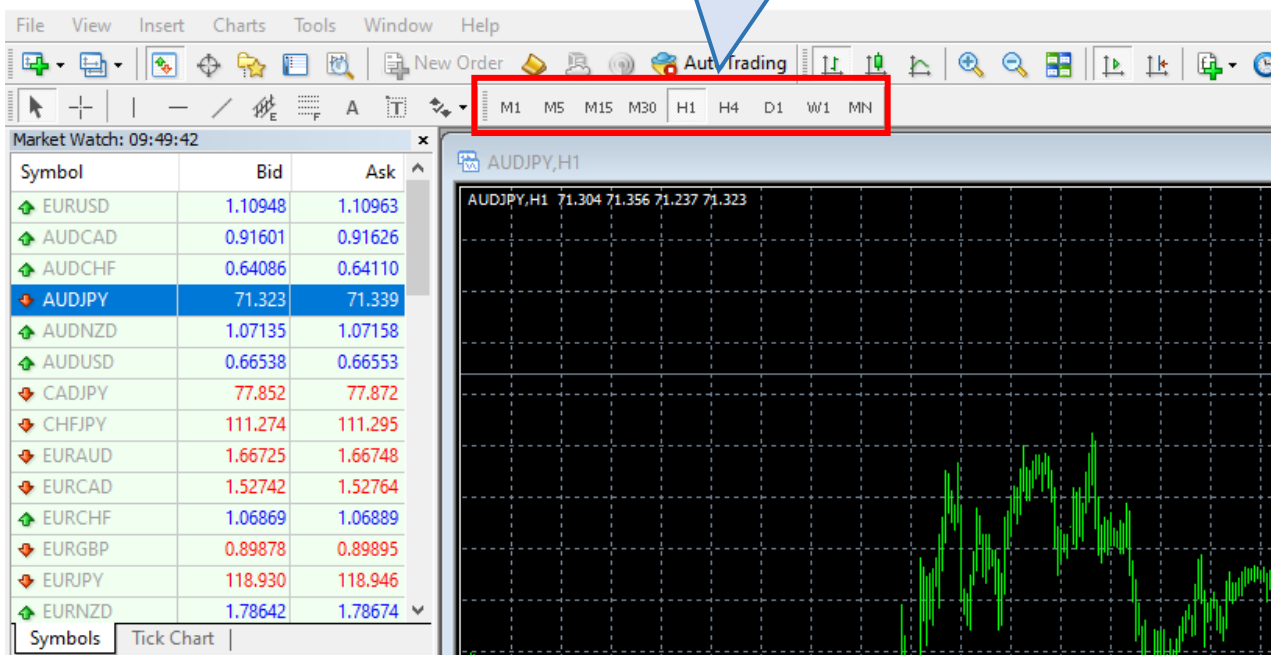

When you click the [maximize] button of opened chart, The Chart will be maximized
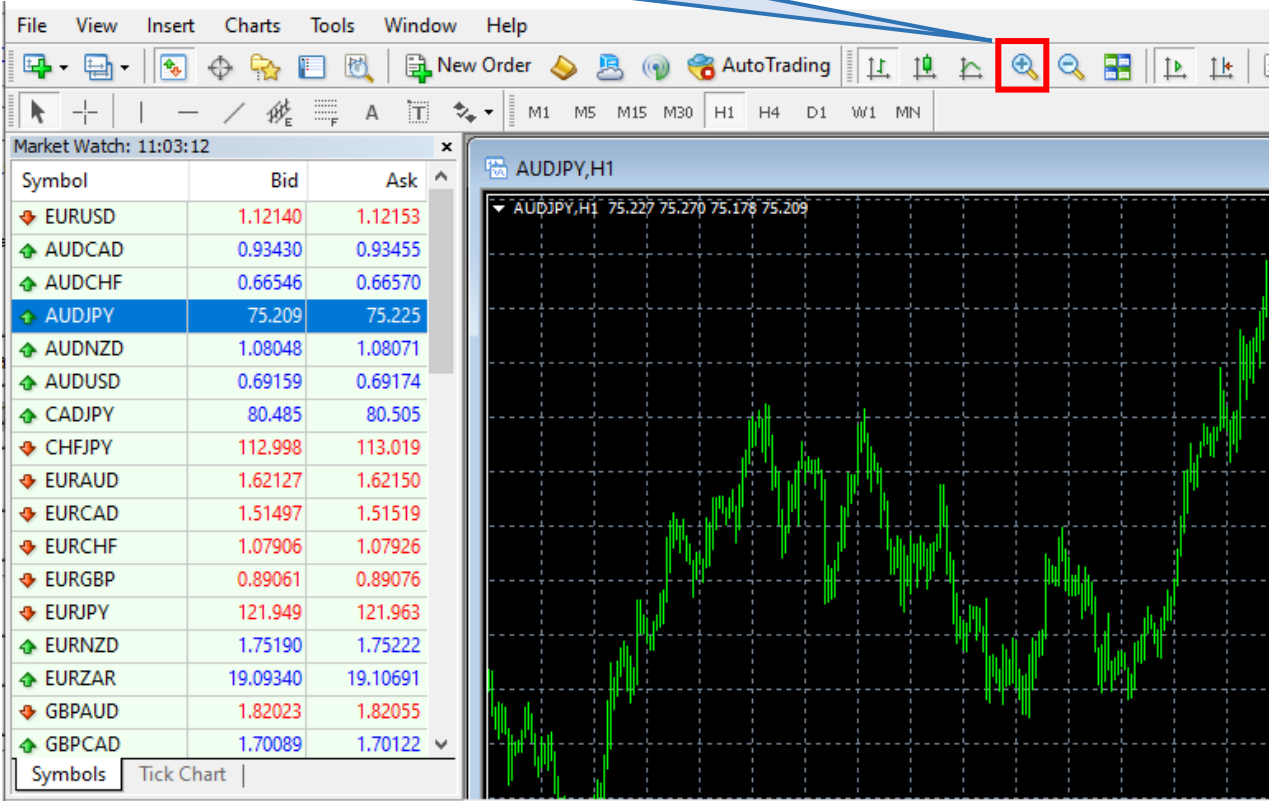

When you click the [Undo (reduction)] button,
The Chart will go back to its original size.

Chart time axis panel:
1-minute display, 5-minute display, 15-minute display and 30-minute display from the left.
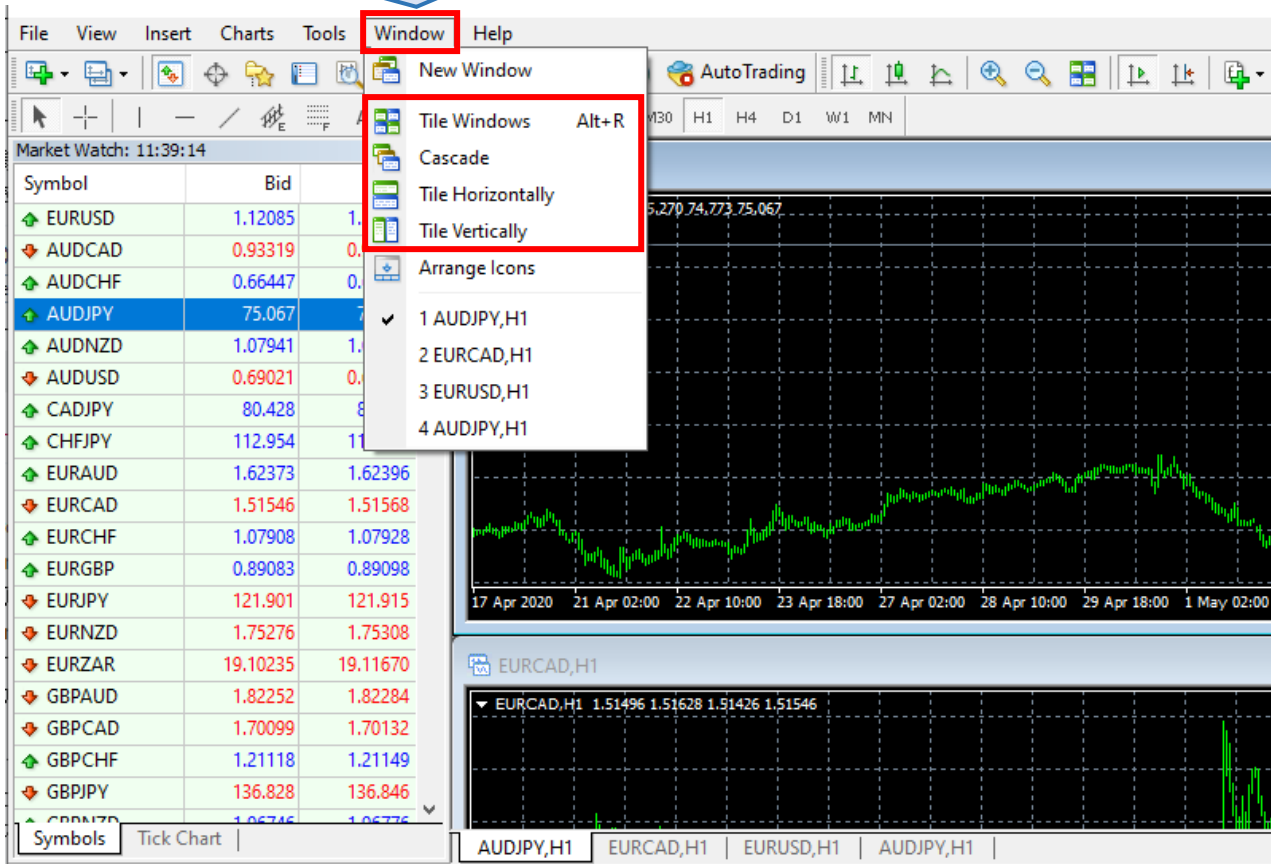

Click the [Zoom In] button to enlarge the display of the chart.

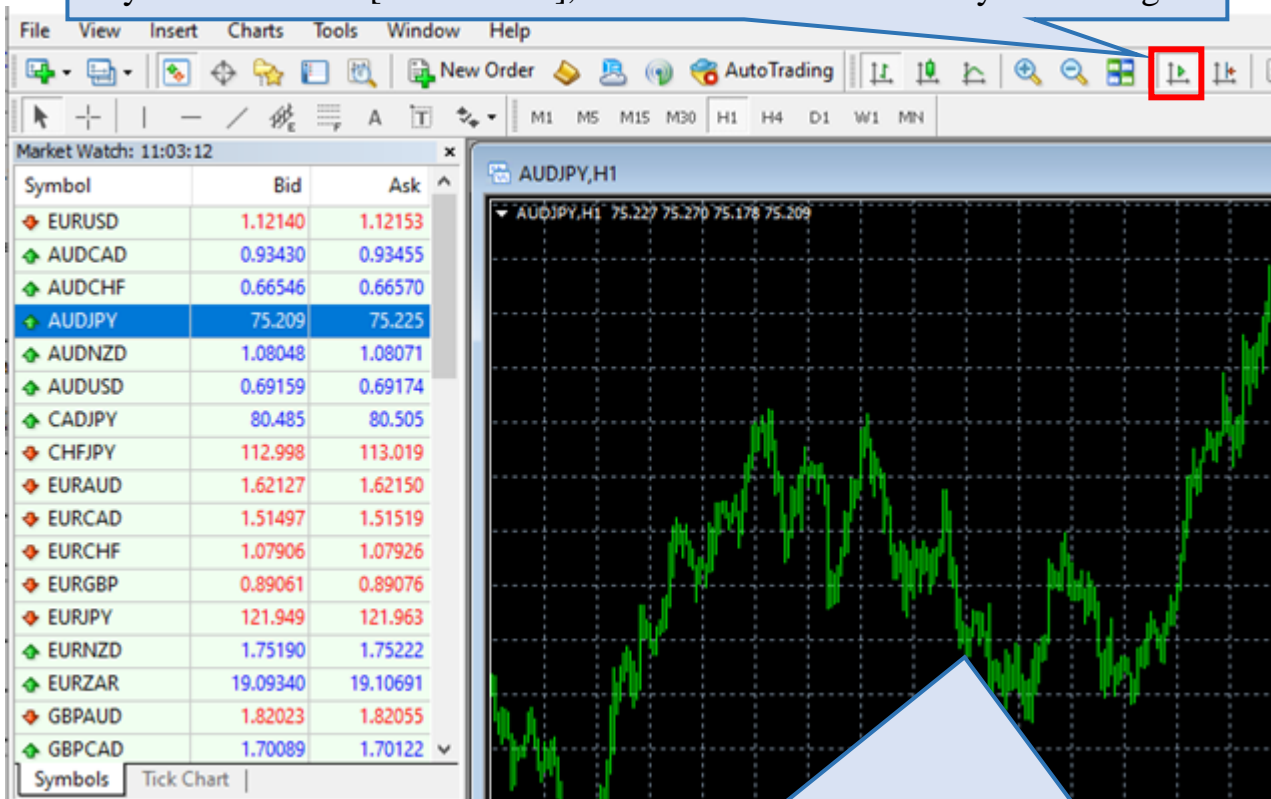

Click the [Zoom Out] button to reduce the display of the chart.

It is possible to display multiple charts.
For multiple display, you can set the Configuration setting that you like in the [Window Arrangement] of the [Window] tab.
