

# MT4 Installation Manual PC Version

## [MT4 Installation method]

→ Download the installer below or from the HP.

<https://gemforex.com/gem-mt4/new-mt4setup.exe>

→ When the download is complete, start to run it by double clicking the installer.

→ Put a check to the red framed portion, then click “Next”.

## MQL5 BRINGS TOGETHER MILLIONS OF TRADERS AROUND THE WORLD!

Be the first to know about all the updates and changes in the MetaTrader platforms

Communicate and share your experience with traders from across the globe

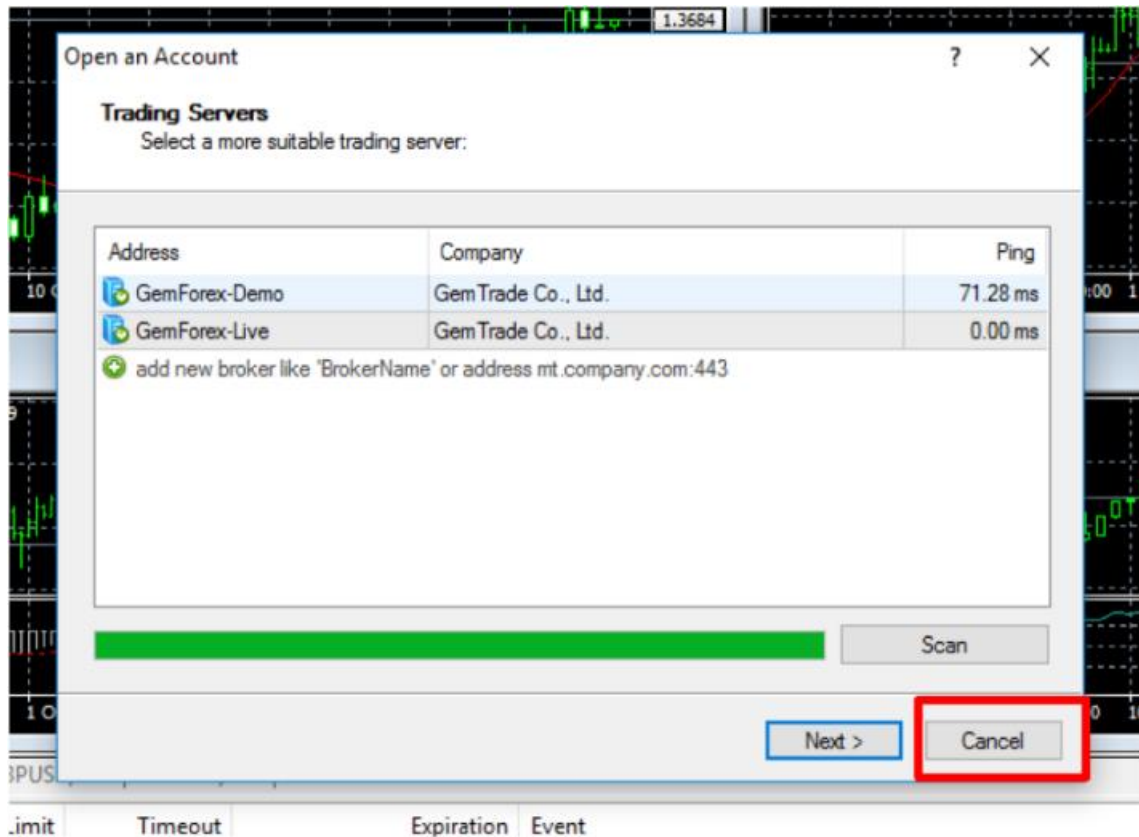

Trade on the financial markets directly from your browser

password will be emailed to you

→ The screen being displayed above is not particularly needed. It would not matter if you want to delete.

→ The installation may take a few moments, please wait for a while.  
If you click the “Finish” after the installation, the MT4 will start.

→ If the MT4 starts to run, the DEMO application window will open.  
In our company, it is possible to open a Demo account only from the WEB.

→ We will take the necessary procedures from here.

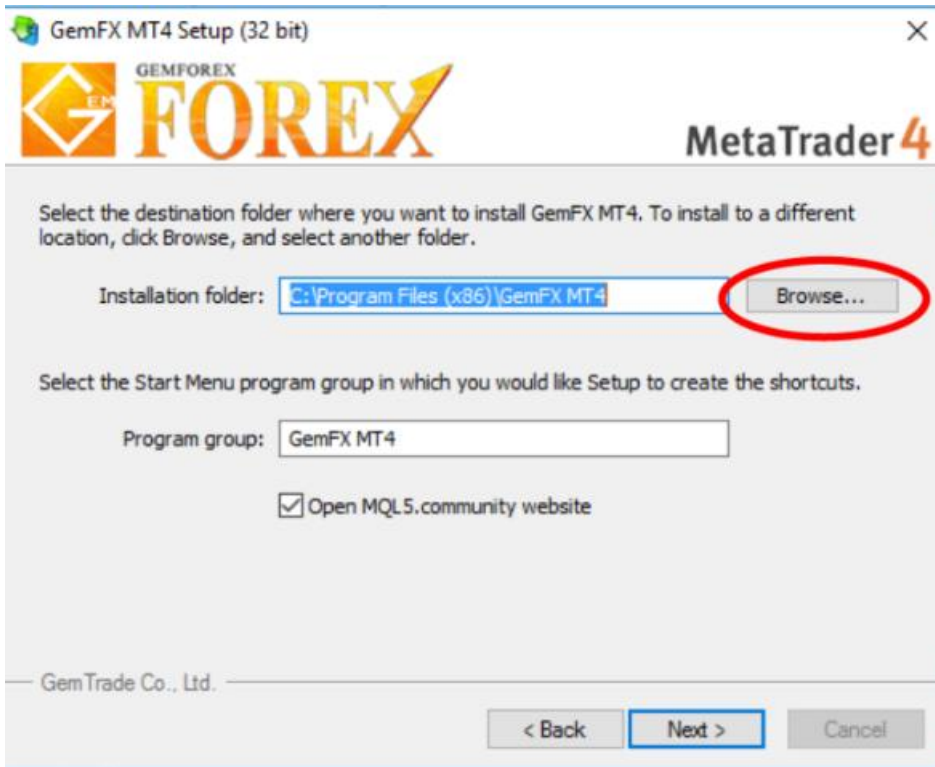

→ For those who already know the log-in procedure of Real Account, if you click the cancel of the above screen, since the log-in information input window will open, you are welcome to use it after entering the information there.

→ If you need guidance about the log-in procedure to the Real account, please refer to the manual.

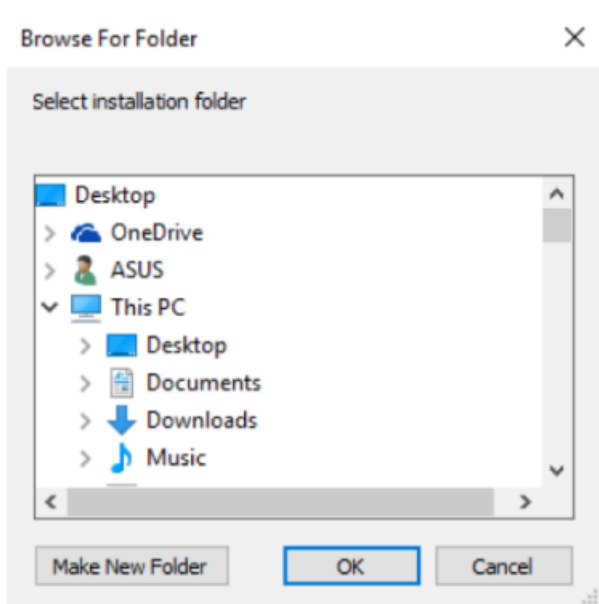

## [MT4 Installation Method of setting the destination]

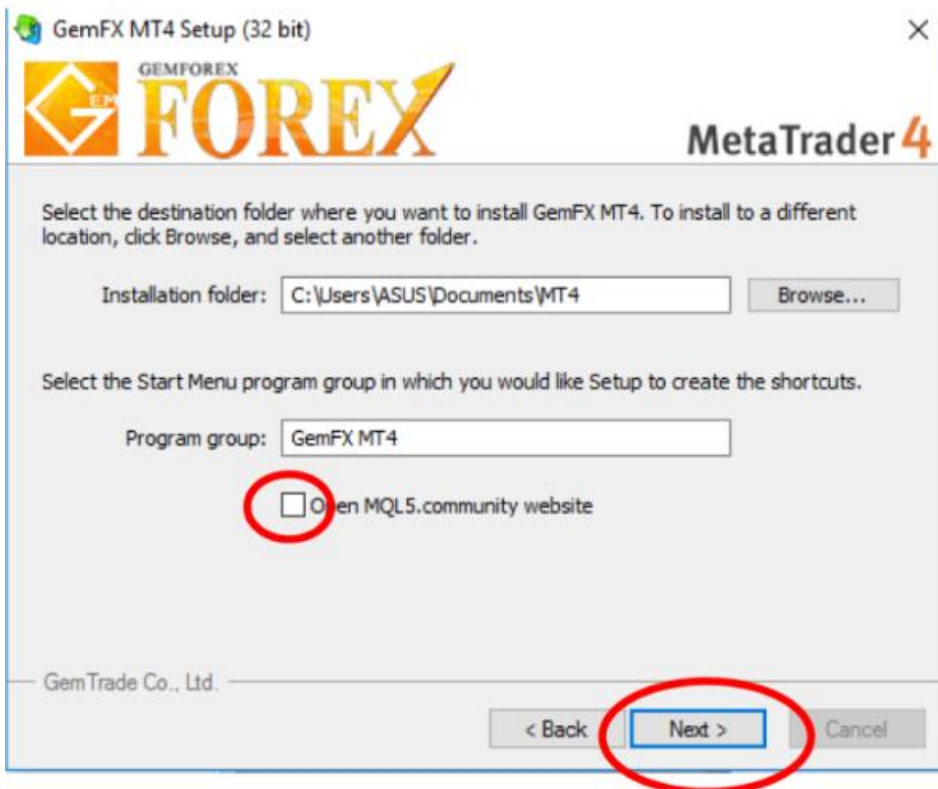

→ Put a check to the red framed portion, then click “Setting”.

→ Click the “Browse”.

→ Select the specified destination from the reference screen folder.

—> Remove the check of the red framed portion and click “Next”.

→ Since the installation will start, if you can click the "Finish", the installation is complete.

→ If you have any other questions, please contact our customer support at any time.
